Editor-in-Chief Search

AOCS seeks candidates for the Editor-in-Chief position of the *Journal of the American Oil Chemists' Society* (JAOCS), the Society's flagship monthly scientific journal. The position requires a motivated individual with research experience interested in making a significant contribution to a global society that provides information about fats, oils, surfactants, and related materials. This is a volunteer position without compensation. According to AOCS policy, the term for this Editor-in-Chief appointment is for five years, with an option for one additional term. We are seeking to fill this position in May 2006, when the term of the current Editor-in-Chief is completed.

The Editor-in-Chief sets direction for the publication while overseeing the paper solicitation process and making final selections for publication. Duties include: leading a team of Senior Associate Editors and Associate Editors, interaction with prominent international authors, attendance at society and industry events, and chairing a journal meeting at the Society's annual event.

For consideration, send letter of intent to Greg Reed, AOCS Press Director, gregr@aocs.org by January 1, 2006.
